Passport

Scope

This report is part of a series of five highly-visual reports covering the 40 markets surveyed in the annual Voice of the Consumer: Lifestyles survey.

Draws together insights from across the Lifestyles survey and provides takeaways on key trends.

Reviews shifting consumer traits and values that influence purchasing and consumption behaviours. *(Visual only report)*

Explores consumers beyond their demographic profile and provides a different perspective on shopping habits and path to purchase.

Offers a concise and clear overview of the consumer landscape, encompassing all aspects of population, households, income and expenditure, and lifestyles.

Connects survey insights with Euromonitor's megatrends, including case studies highlighting how companies are responding to changing attitudes and expectations.

Note: In the Lifestyles survey, respondents provide their age within 5-year increments (15-19, 20-24, 25-29, etc). Given these parameters, generations cited in this report series are defined as follows: Generation Z: Aged 15 to 29; Millennials: Aged 30 to 44; Generation X: Aged 45 to 59; Baby Boomers: Aged 60+

Consumer Lifestyles provides valuable insights into the key attitudes and current perspectives of consumers, and how these influence their purchasing and consumption behaviors. It quantifies consumer behaviors, preferences, and motivations, aligning them with broader trends.

Personal traits and values

Passport

Personal traits and values

In terms of their routines and habits, personal values and social interactions, 73% of consumers continue to value real world experiences in their daily lives. Nevertheless, for Colombian consumers a major concern remains around elevated cost of everyday goods, as indicated by 72% of respondents. The ongoing disruptions in global supply chains, higher cost of raw goods and extreme weather events and climate-related disruptions all resulted in price pressures being felt by consumers across Colombia.

Looking ahead, 39% of respondents believe that climate change will affect their lives more than it does now. This concern remains top of mind for 24% of Gen Z consumers who voiced this. While 36% of respondents believe the world will be a more dangerous place in the future, 62% hold onto the belief that life will be better.

Reflecting alignment with brands and personal values, 33% of respondents in Colombia said they enjoy being actively engaged with brands, while 51% said they only buy from brands that they trust completely. These findings show that consumers care about interactions with their favourite brands and how trust is aligned with brand values.

Additional insights on personal traits and priorities

1. Consumers in Colombia feel it is more important to prioritise time for themselves, with 50% citing enjoying personal time as among their top three priorities. 53% said they will have more free time in future. These priorities reflect a growing emphasis on personal wellbeing and leisure time.

2. International travel continues to pick-up post COVID-19-related travel restrictions being lifted globally. 20% of respondents, including 18% of Gen Z, wanted to find time to travel. This has led to 32% expecting to increase their spending on travel over the next 12 months.

3. 45% of consumers are dedicating time to their favourite activities: 39% said they expect to increase visits to the cinema, 12% go to a concert or the theatre, 13% go to a museum or gallery and 13% said they attend virtual events/concerts.

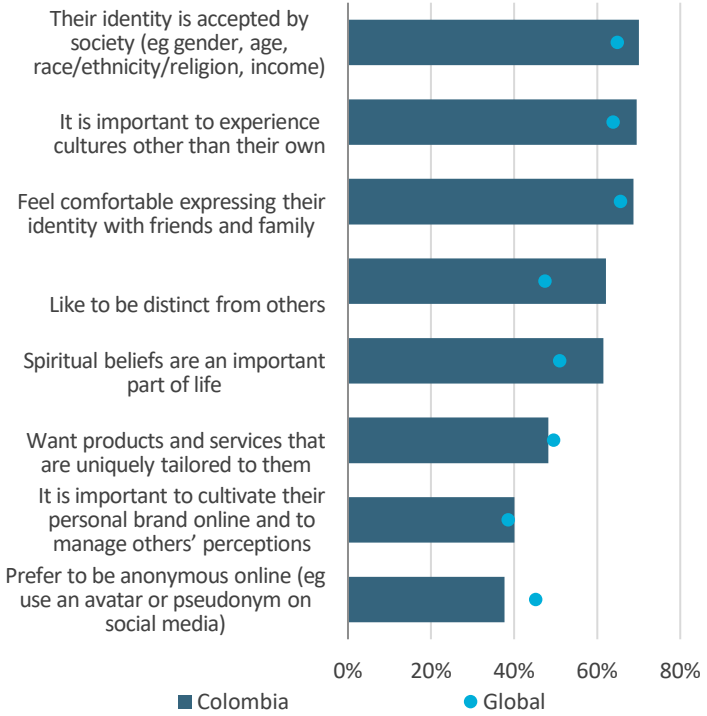

4. Spending time with friends is a top priority for 13% of consumers, including 20% of Gen Z. 53% said they meet up with friends and 22% entertain friends in their homes regularly (at least weekly). 26% expect to increase visits to restaurants, and 27% order food for home delivery at least weekly.

Home life and leisure time

Passport

Home life and leisure time

Consumers value a mix of in-person and online activities, with a preference for activities that can be done at home, supporting a desire for convenience and comfort. Watching television, cited by 75%, and entertaining friends and family who do not live with them, selected by 22%, are all enjoyed in the comfort of the home. Feeling safe and secure at home remains important for all, supported by 49% of Gen Z and 65% of Gen X consumers who stated they want a home in a safe location.

Many consumers continue to shift activities traditionally considered “away from the home” into their living spaces. This includes working from home, selected by 36% of respondents, online and virtual fitness classes, 16%, and online shopping, popular among 17% of respondents. 27% of respondents said having a multifunctional space is a crucial home feature, indicating the need to accommodate these domestic activities.

The convenience and efficiency that smart home technology brings into homes is growing in appeal. 25% of respondents said they already own smart home appliances, while 22% said they consider smart home functionality an important home feature. Smart home technology enhances convenience, efficiency and comfort in the home.

Eating and dietary habits

Passport

Eating and dietary habits

Consumers are more actively managing their weight and dietary intakes. Many are on specific diets, such as being vegan, vegetarian or flexitarian. 21% of respondents said they are trying to lose weight and 61% are actively looking for healthy ingredients. Concerns around health and nutritional properties are important, cited by 44% of consumers that closely read nutritional labels on the products they consume.

Factors such as personal health, rising prices and sustainability concerns are all impacting consumers' desire to reduce the proportion of meat in their diets, as 20% said they are trying to reduce their meat consumption, while 10% said they now eat meat (and fish) only occasionally.

As food prices continue to increase, 24% of respondents are more purposefully looking for private label or low-cost products in grocery stores. Consumers are also taking more time to cook or bake at home at least once a week instead of dining out, as cited by 65% of respondents. To save more time and effort, 22% said they reheat/prepare ready meals. However, those able to afford it, still order in. 27% said they regularly order for home delivery, while 24% are regularly ordering food for takeaway, or picking up ready-made food to eat at home.

© Euromonitor International

Older generations more likely to be on a diet

Baby Boomers claim not to have time for grocery shopping

Barriers to cooking by generation

% of respondents (at least weekly)

Source: Euromonitor Voice of the Consumer: Lifestyles Survey, fielded January-February 2025 (n=648)

Additional insights on cooking habits

1. Although a large proportion of consumers still prepare and eat meals at home, 14% would rather spend their time doing things other than cooking. This includes 13% of Gen Z and 19% of Millennials. Additionally, 7% of Gen Z and 7% of Millennials said they typically replace meals with snacks.

2. 34% of Gen Z and 28% of Gen X said they do not cook for themselves, as they have someone else in their household who cooks for them.

3. Lack of cooking skills is another major obstacle to cooking at home, as 18% of Gen Z and 15% of Baby Boomers said they do not cook very well. 17% of males cited it as a major obstacle to cooking, compared to 12% of females.

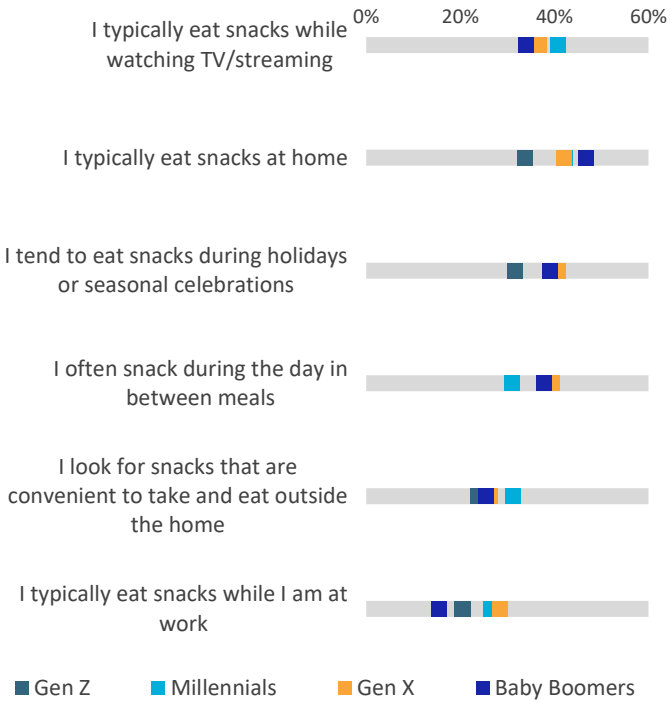

4. In many instances, accommodating busy lifestyles influences consumers' dining choices: 14% (compared to 18% globally) said going out to eat at a restaurant is more convenient, while 7% said they do not have time to shop for groceries.

Working life

Passport

Working life

Employees continue to desire more hybrid work arrangements, which includes working from home, flexible work hours or contract work and freelancing. 43% of respondents indicated they wish to work from home, supported by 50% of Gen X respondents. 38% are demanding more flexible hours in future. Work-life balance also remains crucial, as 47% of respondents cited a job that allows for this as a top priority. They want to have more time for activities outside of work. This will help them reach their personal and family goals.

As AI technologies accelerate into the workspace, uncertainty is rising about future employment possibilities. Employees and workers are increasingly reconsidering traditional career goals, as 40% said they wish to prioritise job security, while a high salary remains important for 39% of respondents, including 43% of Gen Z consumers.

For those with an entrepreneurial spirit, independence remains important. 38% are expecting to start their own company in the future, and 37% said they expect to be self-employed. The self-sufficiency provided by non-traditional employment is also attractive: 18% said they expect to work on a contract or freelance basis in the future, while 13% are expecting to have more than one job.

Health and wellness

Passport

Health and wellness

Physical and mental health priorities continue to affect consumer preferences for investing in their health and wellness. 59% of respondents indicated they participated regularly in physical exercise, and 36% said they used supplements or vitamins. Regular exercise and the adoption of activities to improve mental health continues to gain traction.

With new technology, people can track their health and fitness better. Fitness wearables, smart watches and other health-monitoring devices are continuing to gain traction. The share of respondents owning fitness wearable/health tracking devices has reached 17% in 2024. Furthermore, 27% of respondents said they regularly visit health-related or medical websites.

37% of consumers indicated they are monitoring what they eat to manage their weight, while 15% said they are reducing their alcohol consumption. Consumers are thus actively managing their diets and increasing sober-conscious lifestyles. Focusing on information on labels, 40% of consumers are seeking out foods that have additional health and nutritional properties, with 78% also saying they are willing to pay more for these features. A shift towards a more proactive and comprehensive approach to maintaining and improving overall health is evident.
